

# Precision Medical Cabinetry

## PRECISION MEDICAL CABINETRY

We can help you integrate computer technology into everyday patient care. Creating functional workstations that can consolidate multiple tasks into an easy to use point of care system.

Superior performance, reducing maintenance costs and a much greater life span, increasing return of investment.

Our fold down is at least 50% stronger than our competitors, being able to withstand 405lbs makes our doors the strongest in the industry.

Propriety to Precision Medical Cabinetry.

## FULL CUSTOMIZATION

Whether it's cabinet size, placement, components or even budget, our flexible design and manufacturing allows us to meet specific needs.

We have the ability to add or remove cabinet components and create the product you need.

Additional storage, locking solutions, computer equipment, medical peripherals, articulating arms, aesthetics and more.

We strive to produce the correct product at the right price.

## WALLMOUNTED COMPUTING CABINETS

### ARTICULATING ARM CABINETS

Articulating arm cabinets create secure and functional housing for wall mounted articulating arms.

There are several styles of arms available. We are able to integrate any arm into any design to match specific requirements, such as space, style and functionality.

### FOLDING DOOR DESIGN

The folding door was engineered to allow our cabinets minimal door protrusion without sacrificing the work surface used for writing or preparing medication. The door can be opened smoothly with one handed operation and has an assisted self closing mechanism. This door system allows more flexibility when choosing computers and other components. Folding door utilizes our unique door hinging system giving it the same strength and durability as our standard door.

### SLIM LINE ARTICULATING ARM CABINETS

Our Slimline arm cabinets are designed to fit an articulating arm into a 6" cabinet. The keyboard and monitor are staggered to minimize cabinet depth, thus placing the monitor into a higher position in line with eye sight.

### SLIM LINE COMPUTING CABINETS

We have several styles of both 4" slim line and 6" slim line cabinets. Space saving, secure and fully functional computing cabinets for both in-room and hallway placement.

### SWING OUT COMPUTER CABINETS

The swing out wall mounted computer desk series is another design based upon patient/caregiver interaction while maintaining an efficient workflow. This precision built wall mount computer workstation is aesthetically pleasing built to withstand rigorous daily use.

### OPEN FACE COMPUTER CABINETS

Open face hospital computer wall mount series offer a small footprint, increases efficiency with ease of access. This is a functional cabinet for both hallway and in-room use.

## MEDICATION SOLUTIONS

### STORAGE AND DISPENSING CABINETS

We offer a variety of designs for medication solutions, all are fully customizable for your exact requirements. With a selection of locks available, covering a large range of security levels.

### INTEGRATED MEDICATION/COMPUTING

Our custom design and flexible manufacturing processes allow us to easily integrate medication or storage compartments into any existing product. Without the loss of any functionality or options that both our medication and computing workstations offer.

## MEDICAL CART SOLUTIONS

### OBSTETRICS - CARTS

Our obstetrics furniture is designed to integrate compact IT stations into obstetric rooms without the loss of function. Aesthetically designed to merge into existing surroundings, upholding a home like environment. Fully customizable to the specific needs of your facility and clinicians.

### SUPPLY CARTS

Made using high pressure laminate, able to withstand all chemical cleaning solutions to ensure a sterile environment. Exceeds all continuous use applications. Designed with rounded edges for durability and a true custom furniture look. Completely customizable to your exact requirement with many locking solutions and anti-tip safety features.

## SLIMLINE MODULAR WALL SYSTEMS

Slimline modular wall systems are a versatile and complete solution for medical facilities. Flexible modular design allows the hospitals to order a cabinet system, that is specific to your own requirements. configurations that may include drawers, mobile carts, display shelves, television, computers, glove storage, wardrobe, medication supply & storage. This custom and flexible approach will allow you to create a wall system that encompasses all task at hand.

You can also choose to expand the cabinetry at a future date with the same ease. This flexible design and manufacturing process also allows for fast and simple installation, reducing on-site work time, for minimal intrusion on your facility.
